

PUBLIC NOTICE

The Tennessee Division of Air Pollution Control (TDAPC) has received requests for construction of air contaminant sources as noted below. The proposed construction is subject to part 1200-3-9-.01(1)(h) of the Tennessee Air Pollution Control Regulations, which requires a public notification and 30-day public comment period. Interested parties may express their comments and concerns in writing to Mr. Barry R. Stephens, Director, Division of Air Pollution Control, 9th Floor, L & C Annex, 401 Church Street, Nashville, Tennessee 37243-1531 within thirty (30) days of the date of this notice. Questions concerning a source may be addressed to the assigned Division personnel at the same address or by calling 615-532-0554.

Individuals with disabilities who wish to participate should contact the Tennessee Department of Environment and Conservation to discuss any auxiliary aids or services needed to facilitate such participation. Such contact may be in person, by writing, telephone, or other means, and should be made no less than ten days prior to the end of the public comment period to allow time to provide such aid or services. Contact the Tennessee Department of Environment and Conservation ADA Coordinator, 12th Floor, 401 Church Street, Nashville, TN 37243, 1-866-253-5827. Hearing impaired callers may use the Tennessee Relay Service, 1-(800)-848-0298.

The applicant is American Woodmark Corporation, with a mailing address of 1 American Woodmark Dr., Humboldt, TN 38343. They seek to obtain an air contaminant permit (Division identification number: 27-0174-01/58683) for modification of a roller-coating operation located at 1 American Woodmark Dr., Humboldt, TN 38343. This existing operation will increase the amount of coating applied to panels used to construct cabinets. The actual amount of volatile organic compound emissions will decrease, however the company is applying for an increase in their permitted amount. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There will be no physical construction. Regulated air contaminants would be increased by this source. Questions concerning this source may be addressed to Robert Benjamin at the same address or by calling (615) 532-0564.
